

DIAMALLOY®

AVIATION SNIPS

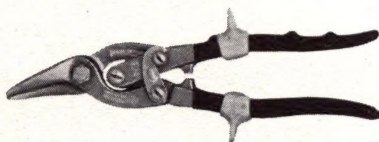

(Compound Action)

Beautifully
Chrome plated
to resist rust
and give
eye appeal.

Drop Forged Steel Handles, Plastic Coated with Slip-on Grips

1. Handles are solid drop forged steel instead of stamped sheet metal.
2. New design of handle gives better grip.
3. Narrow body of snip allows cut metal to pass freely over edge of snip.
4. Furnished with oil and grease resistant soft plastic handles at no extra charge. Small extra charge for grips to prevent slipping.
5. All components fully heat treated for long wear and service.
6. Blades made of special analysis Diamalloy steel with serrated cutting edge for easy cutting.
7. Large hardened pivot bolts give smoother action with less wear.

DIAMALLOY

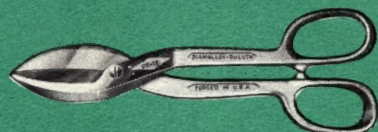

METAL CUTTING SNIPS

Drop forged of special analysis Diamalloy tool steel, heat treated all over and tempered to extreme toughness. Cutting edges hardened by electronic process, making them exceptionally hard and long wearing, leaving the rest of the tool strong and tough.

Tool steel bolt is oversize with close screw adjustment for setting cutters, and large locking nut, adding strength to the joint and lessening need for readjustment. Blades are ground on machines built especially for this tool.

Diamalloy Metal Cutting Snips are nickel-chromium plated for lasting beauty and permanent protection against rust and corrosion. Will not rust in basements or damp places, in the tool box, on the job or in transit between factory and user.

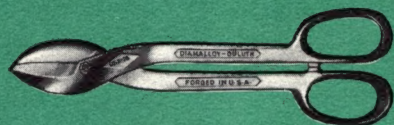

Diamalloy Metal Cutting Snips have a very smooth cutting action on all kinds of sheet metal from wire screen or soft aluminum to hard shim stock. Besides being the first choice of mechanics, they have exceptional appeal and utility as a household tool for both men and women. They are handy in the kitchen drawer as well as in the tool box.
